

## RIFIS Update

### Diagnosis Detail Page

March 7, 2013

Some changes were made in June of 2011 to the dropdown labeled "Diagnosis by". We added to the generic list of professionals choices for NA, Other, and Unknown. Unfortunately, the "Diagnosis by" field information does not appear on reports we currently use to compile the required information for the six month census. Therefore, we have added to the Axis 1 (DSM-VI) code list an alternative code called (we have demonstrated in scenario #3 how to use this code):

**Description = N/A No Evaluation Needed/No Diagnosis**

**Code = 000.00**

Listed below is the protocol for the four scenarios when filling out the RIFIS Diagnosis Detail Page.

#1. A **new referral** will have a **blank Diagnosis tab**, as the FSCC is working with family.

**AI Green**

RIFIS ID	57701
Status	Active
Last Name	Green
First Name	AI

Demographics FCCP Open/Close

Family Relations Natural Supports

Assessments & Forms **Diagnosis**

Activities Progress Notes Notes

Click on Diagnosis tab and message below will confirm no Diagnosis pg. has been created

**0 record(s) returned**

#2. The DSM-IV code, **799.9 Deferred**, is used by a qualified professional when a child/youth is being evaluated and a diagnosis has not yet been determined.

**AI Green**
